SUMMARY

AI Product Manager with 7+ years of experience building LLM-powered products, conversational AI systems, and multi-agent automation workflows. Strong hands-on exposure to AI orchestration frameworks, token optimization, risk-controlled execution systems, and real-time data pipelines. Experienced in building AI systems that analyze markets, enforce decision constraints, and execute actions through secure APIs.

WORK EXPERIENCE

Marketstar | Product Manager - Nytro.ai (AI-Powered Sales Enablement)

Aug 2024 - Present

- Owned end-to-end product lifecycle of AI-powered Sales Training platform built on a structured multi-agent architecture.
- Designed token usage balance of high-reasoning models (GPT-5/Gemini) with cost-efficient alternatives to control spend.
- Designed data ingestion and contextual awareness models to improve simulation realism and decision accuracy by 25%.
- Collaborated with BE teams to build data processing pipelines using streaming architectures, cutting response latency 50%.
- Led VAPT remediation and ensured ISO-aligned AI deployments in enterprise environments.
- Defined API strategy and external integrations for client data sync, enabling interoperability with LMS & CRM platforms.
- Reduced evaluation variance across AI models by 70% through optimized scoring and data segregation methodologies.

Personal Passion Projects | Crypto trading bot, Humanize AI, Leads Scraper

- Built a fully functional multi-agent trading bot using CrewAI, LangChain, Python, Supabase with clearly defined agent roles. Analyst (market + TA indicators), Risk Manager (position sizing, risk constraint), Historian, Messenger, Executor (Binance)
- Implemented human-in-the-loop approval before live execution, defined enforcement strategies to prevent or high-risk trades.
- Structured token usage to balance reasoning depth vs execution speed.
- Captured trade failures and logged structured feedback for system refinement.

Indiamart Intermesh Ltd. | Product Manager - Business Intelligence - ecommerce

Dec 2022 - Aug 2024

- Directed data-driven communication and analytics platform serving 10M+ SMB users, enhancing call conversions by 15% through intelligent feature delivery.
- Implemented AI-driven decision flows for spam call detection through convo AI improving blacklisting accuracy by 15%.
- Ensured data security, privacy, and uptime compliance across communication and analytics platforms.
- Collaborated with telecom partners to optimize cloud telephony infrastructure, achieving 70–90% operational cost savings.
- Implemented AI chatbots (DialogFlow + GPT) for intelligent query handling, reducing manual workload by 25%.
- Coordinated across HR, ops, and data science teams to align automation initiatives with business strategy and KPI tracking.

[HCL Technologies | Giantview Technologies | QBurst Technologies] Early Career Roles - Engineering & Product. 2016 - 2022

- Supported COPC certification audit for enterprise support operations, focusing on process control and data integrity.
- Led process improvement initiatives for tech clients, identifying \$800K in potential savings through time-and-motion studies.
- Conducted gap analysis, time-and-motion studies, and implemented best practices aligned with COPC standards.
- Developed and maintained web applications using PHP, Drupal, WordPress, Laravel, and JavaScript for 7+ websites.
- Prototyped and authored PRDs during a PM internship focused on influencer marketing tools (e.g., Socialbook, Upfluence).

EDUCATION

Indian Institute of Management (IIM) Visakhapatnam | MBA (GPA: 3.01/4.00)

2019 - 2021

Govt. Model Engineering College | B.Tech., Computer Science Engineering (GPA: 7.22/10.00)

2012 - 2016

Sharjah Indian School | Class XII (2012) – [90%] | Class X (2010) – [9.0/10.0]

SKILLS & TOOLS

- **AI & ML:** LLM, NLP, Contextual Memory, Persona Control, Prompt Engineering, **Agentic AI:** n8n, CrewAI, Langchain, RAG
- **Product Management:** 0→1 Roadmapping, CLM, Agile Delivery, A/B Testing, Data Security
- **Growth & Analytics:** User Acquisition Funnels, Predictive Analytics, Intelligence Dashboards, Amplitude, MixPanel
- **UX & Engagement:** Personalization, Retention Strategy, Feedback Loops, Mobile/Web Experience
- **Tools & Tech:** Antigravity, OpenClaw, ClaudeCode, PowerBI, GA, GTM, DialogFlow, Axure
- **Methodologies:** Agile (Scrum/Kanban), OKRs, User Research, Market/Competitor Analysis, Compliance and Security
- **Tech Stack:** Python, React, GCP, Firebase, React, PHP, DialogFlow, REST APIs

LEADERSHIP & AWARDS

* **Emerging Star of the Year** | Indiamart (2023-24)

* **Pillar of Success Award** | Indiamart (2023)

LANGUAGES

- English (Professional), Hindi (Professional), Malayalam (Professional), Arabic (Beginner)
